

# Peer Prediction - The Original Mechanism

Reading Questions 22

Monday, Nov. 26th 2012

## Reading Questions

1. How is the scoring rule different from the ones we have studied so far? (eg. How is the predictive distribution  $P$  different?)
2. Is truth revelation the only Nash Equilibrium? Why or why not.
3. What, if any, are reasons that may prevent this mechanism from being used in practice?
4. Name some advantages of scaling.
5. How do we deal with risk aversion?

## (Optional) Generic Response

Respond to the paper following the guidelines on the front page of the course website (under 'Submit Comments and Presenting Papers').
